DAC Reusable Crates are designed to be used specifically for the transportation of I-Design Components. All interiors are blocked and carpeted to securely hold each component safely in place during transit allowing easy removal and repackaging. Our crates are constructed from durable plywood and built to last. As shown above, you will find the necessary tools needed to open the crates quickly and effortlessly.
DAC’s design team set out to develop a new window display that would be more economical for our customers, without sacrificing quality or functionality. Everything was questioned from the techniques and methods used in manufacturing, to how the display is packed to make it less expensive to ship. Identifying unnecessary expenses while maintaining a rich design, DAC is now offering the most cost-effective display ever.

**Slider Flat Panel**
Overall Dimensions
49.5”(w) x 22”(d) x 73.25”(h)

**Double Hung Flat Panel**
Overall Dimensions
31.5”(w) x 22”(d) x 73.25”(h)
The displays in the Elite Series are simply the most durable displays we produce. They are engineered to meet the demands of mobile presentations. This series is available in DAC’s standard color options.

All of DAC’s Elite rolling displays are made with large 4” durable casters that enables the display to be transported across rugged surfaces with ease. The extended base platform acts as a protective bumper for the display.
Elite Series

Mobile Show-n-Go Displays
Available for Double Hung, Casement, Slider & Picture Window

Mobile Stow-n-Go Displays

Color Options

Payment Options
We accept most major credit cards.

Terms
To establish a Net 30 account with DAC Products, please call Customer Service at 1-800-431-1982 before ordering. A 50% deposit is required when order is placed.

Lead-Time
Most standard items are in stock and available for immediate shipping. If an item is not in stock, lead-time is up to 4 weeks.

Receiving Procedure
Open and inspect all packages for damage immediately upon delivery or mark bill of lading (BOL) "Subject to Inspection". Note any damage to the packaging on the BOL before the driver leaves. If product damage is suspected or found, save ALL packing materials. This includes inner and outer boxes and all packing materials. If possible take pictures of the damaged product and packaging. Notify us immediately. Due to the limited time frame for us to file a claim for shipping damage, any damage not reported within five (5) business days of delivery becomes the responsibility of the customer.
